

# RAINBOW CURRENCY FOUNDATION

The Board of Directors of the Rainbow Currency Foundation

7 January 2020

**To all dear YEM owners**

Please read carefully what we have to say.

Thank you very much.

**Subject:**

Requesting support for the one-year extension of the current Board of Directors of the Rainbow Currency Foundation (BOD RCF) and agreeing that future boards will also have a three-year term.

**Reasons:**

**1) Important period in an upward trend**

- a) Together with the UN, we are in an important phase of growth and consolidation, where it is important to concentrate and without interruptions, to effectively carry out and complete projects and to continue our successes to date and put them on a most sound basis.

A change of board would not allow continuity and bring interruptions where the new team would have to find itself new, find its true role, define goals, develop unity and strategies and so on. The latter is not so easy with the different cultures and individuals represented on the board.

It is extremely important that all directors on the board "walk through the same door". That this will not happen overnight can be predicted with certainty from our own experience.

- b) We also want to ensure stability with our current strict rules for trading, for as long as it takes and until the YEM has become mainstream to the extent that we see a much greater and reasonably constant demand for the YEM. We are confident that we can achieve this in 2020.

A current change in the RCF team would not ensure continuity on very important issues at the moment. And it must be united, and even in case of disagreements with

representatives of the RC parent company (Unicorn Network), seek and find solutions in a harmonious and respectful manner.

## 2) Current projects

- a) Especially now, in the hot phase, RCF Exchange needs a competent team that is familiar with the internal, partner company and development. Some of these tasks require very special knowledge, which is not often found. We are so lucky to have such people in the team.

The RCF Exchange will be going soon; we are working at full speed on this project.

- b) There are several companies that have agreed to come to the SafeZone through RCF. These processes are not yet fully completed, but will soon become visible. Further such projects are either in planning or already started.

- c) There are ongoing negotiations in cooperation with one of our consultants with companies, which either come to the SafeZone or become independent YEM acceptance points.

- d) Various humanitarian projects are either already at an early start or just before; for example, the hospital project in Uganda...and...in Africa two projects for organic farming and other projects together with a charity for education...and...several other humanitarian projects in different countries that still need the personal attention of certain different directors.

- e) Projects such as congresses (Uganda, London, etc.) are to be continued and were made possible in part due to much preparatory work by RCF. This was confirmed to us in writing and without being asked.

Some of the listed projects are absolutely personal, not transferable, not complete and should be completed and put on a good stable path before these directors leave office.

## 3) Contacts with governments and organizations

Ongoing contacts and negotiations with government agencies are underway and need to be continued. Some of them are again person-dependent

## 4) Financing

There are ongoing efforts to provide massive funding to the RCF for now and for the future.

This project is completely personal (Lora). It will, if all goes well (99% secure), provide RCF with great financial opportunities for the organization as a whole, for paid employees for tasks to be done over the long term, and much more.

We have been able to provide financial support to members more and more often, and will then be able to provide much more support to those in need within the membership.

Apart from protecting the interests of all YEM owners, our YEM owners who are in need are also a central concern of RCF.

### **We are here for YOU!**

We have received feedback and gained the conviction that our work as a board has become better and better and effective.

We have gained enormously in momentum and skills and committed to serve with these ALL YEM owners.

### **Previous achievements of RCF**

An early action was the creation and release of the RainbowCurrency.org website.

Communication with the governments of the 7 regions and with the banks of several countries and the IMF.

Contacting the German Ministry of Finance. Confirmation of the acceptance of RC in connection with the EU Court of Justice ruling as a replacement currency was received.

Application of TWINKLCHAIN of Rainbow Currency as a block chain solution for the block chain committee of the Central Bank of Israel - confirmation of acceptance has been received.

Application and acceptance by the Union of International Associations (UIA) as member and INGO. We have successfully registered RCF in the new UIA Yearbook 2019. This also means recognition by the United Nations.

We have registered many humanitarian, educational and other organizations around the world. They will benefit from the donations of RCF charity plans and receive further training on how to attract many YEM donations from staff and donors.

RCF gave the lowest name of RC a name, "DAN".

The official, state-of-the-art RCF exchange for trading YEM and all YEM-related coins is making great strides in development and we are waiting for its launch very soon. In this context, a cooperation with Prior Capital for the safe and successful settlement of Fiat currencies has been agreed.

Successful contacts have been made with several investors from different countries to obtain sufficient financing for all RCF projects.

RCF has been invited by the Crypto Currency Law Spokespersons to participate in the working table, working for the regulation submitted to the Senate of the Republic of Colombia. Our South America Director traveled twice to the city of Bogotá to participate in this important work.

RCF was invited to participate as an exhibitor in the XXXIII Inter-American Accounting Conference, with the Latin American support of auditors supporting the regulation of cryptography. RCF will represent the Colombian Working Table and present the progress and conclusions of this working team.

RCF Colombia is temporarily registered in Blockchain Colombia. Once RCF Colombia is legalized in the country, it will become fully part of this institution supported by the Colombian government.

We have represented RCF at international Blockchain congresses in various fields.

RCF negotiated a partnership with TRUU in cooperation with an Austrian Academy and the Unicorn Network - Truu, an innovative world-class international pure water and clean air supplier.

Alone and in cooperation with the same academy, RCF supported the successful integration of various YEM payment acceptance points, many of them in the craft and construction industries.

Examples are:

Furniture making  
Tiled stove construction  
Infrared heating systems  
Window renovations

Furthermore:

Health Services  
Truu Water and Truu Air - These are world-class appliances and technologies for private households and businesses for the very best cell-available water and the very best indoor air.  
Health books  
Tax consultancy

In addition, there are contacts with various construction companies in Colombia that are interested in offering YEM-paid housing immediately after the plan has been accepted by Colombian law.

### **Outlook and ongoing projects and nearly completed achievements**

The RCF is in the process of applying to the United Nations for consultative status.

Finally, the registration of RCF in Liechtenstein, which involves a larger budget, is imminent, as is the registration of RCF in other regions.

Close networking with an increasing number of international organizations and institutions, NGOs and INGOs.

We will soon be back in touch with all finance ministries around the world, informing them of our exciting new developments and then focusing on specific countries that are more open to crypto-currencies.

There is the possibility for a smaller country to use RC as official electronic money; if we succeed, we will have created the conditions for others to follow.

Continuing to support and enroll more and more additional, very valuable projects.

#### Examples:

Supporting the construction or other funding of a hospital with YEM in Africa.

Support of organic farming in Africa.

Support of educational projects, humanitarian projects, clean water and energy supply all over the world.

### **Business integrations in current negotiation and in progress:**

Insurances

International Taxi Services

Large real estate company

Window renovations and window construction in general

Wall and floor insulations

Food chain in Austria

Professional tool chain in Austria

Various car suppliers

Health Systems

Health services  
Training and Coaching Partner  
PC and mobile phone partners  
Organic farmers  
Organic food suppliers  
Garment industry  
Hotel wasteland  
Travel industry

### **Future term of office of the RCF Board of Directors**

Supervisory bodies are usually in office for longer and, in our experience, this makes sense. Therefore, a general time span of more than 3 years would be desirable for future boards in order to be able to really develop and complete projects beyond the time of finding the right board at the beginning. And that often does not happen very quickly.

### **Here now our Request**

We now ask you to agree to the following 2 points and give us your "YES":

1. That this board can continue its work, stabilize and put everything on a very good foundation, in order to hold the next election in February 2021, after exactly 3 years.
2. We ask the YEM owners to agree with us on this point as well, that a three-year term of office will also apply to future boards that succeed us.

With best regards!

Lora M. Bilger

**President of the RCF - for the entire Board of Directors of the Rainbow Currency Foundation**
