

# London Crypto Conference October 12<sup>th</sup> 2019

Content and information on RCF and RC given by Lora M Bilger

Dear participants, on behalf of the Rainbow Currency Foundation I also want to express how happy we are to meet you all here to share and exchange information.

And a big **thank you** to the organizers of this event who did so much to make this happen.

**Let me start with our**

## **MISSION STATEMENT OF THE RAINBOW CURRENCY FOUNDATION (RCF)**

The international *non-profit* Rainbow Currency Foundation (RCF) consists of a Board of Directors of seven crypto experts from all continents. They have been elected in February 2018 by over three thousand holders of the crypto currency Rainbow Currency (RC).

**The Board of Directors of the RCF is responsible:**

- To provide and support information and education about RC - with the trading symbol YEM (*Your Everyday Money*).
- To support international recognition of this RC to become a household name and a leading component in the Crypto Currency World.
- For controlling and overseeing the Rainbow Currency worldwide and to protect the interests of the fast and constantly growing number of YEM holders.
- For the growth of global awareness of the crypto currency RC as a substitute for fiat money in a growing international and local online and offline economy.
- To make decisions based on experience, knowledge of the competition, awareness of cyber crime and solid research and implement them with Honesty, Integrity, Privacy and Transparency.

- To accept its duties with the awareness of the impact and effect its decisions will have on the future of the development of the RC, its owners and users.
- To present itself and the Currency in the best way possible, collectively and individually, so that the awareness of its good ethics and professionalism will grow internationally in the public eye.
- To serve all time and in the best possible way, with all decisions and actions, the interest and benefit of its Board of Directors, its employees and all RC holders.
- To provide help to as many as possible valuable social and educational projects and charities and to help them with donations, getting donations and beneficial contacts to blossom in every possible way and on every level.

## **RC and YEM**

### **History of RC**

Originally initiated by the Unicorn Network, Rainbow Currency (RC) was developed by more than 3,200 Internet users from 157 different countries.

### **ICO**

RC had a successful Pre-ICO and ICO at the end of 2017 and was first listed and released for trading on December 1, 2017.

### **Purpose of the RC**

Millions of members and consumers around the world can benefit from offers from companies that have proven trustworthy, secure and respectful.

You can buy with the assurance that all personal information will be kept confidential, the company will be honest and payments will be secure and anonymous - in TWNKLCHAIN.

The RC differs fundamentally from most crypto currencies in the following features: It is very different, especially because it was NOT designed and introduced as a speculative object for sole exchange trading or for fast day trading, e.g. as in foreign exchange trading.

YEM was created exclusively as a currency for online and offline buying and selling of services and goods of all kinds. It is an object of exchange for real values and added value.

YEM is moved on a private but publicly visible block chain. Further information on this blockchain can be found at [www.twinklchain.com](http://www.twinklchain.com)

No matter where you live, RC offers a completely new and unique opportunity for consumers and businesses alike to buy or sell:

- With ease
- Fast
- Internationally
- No or low fees
- No bank charges
- No or low Fiat exchange fees
- Data protection, security and quality assurance

### **European Court of Justice ruling:**

European VAT/Taxation treatment of Bitcoin and other so called virtual currencies: The European Court of Justice (ECJ) ruling of 22 October 2015 states that the kind of crypto currency our Rainbow Currency represents is already fulfilling the conditions to be accepted in the EU as a supplement for fiat currency.

### **The RCF**

RC is supervised by a foundation, the Rainbow Currency Foundation (RCF), whose 7 directors were elected by the RC owners.

### **History or RCF**

In February 2018 was the election of the Board of 7 Directors.

Each Director represents one of the following areas of the world:

Europe, Asia, S. E. Asia & Oceania, Africa, India, Central & North America, South America.

From December 2018 on the RCF has begun to involve external consultants in its planning and decision-making processes.

This advisory group comprises experts from various fields who relate to the Foundation's overall work and tasks and more will be added when appropriate.

RCF is registered in Nevada, USA.

### **Purpose and Tasks of the RCF**

- Rules & Regulations
- Protection of currency holders
- Control
- Bringing RC/ YEM to the public awareness
- Humanitarian work

**Regulations** of trading rules on exchanges have the following purpose:

Ensuring the stability of the value of the currency.

Speculative and destabilizing trading is prevented and high volatility is impossible .

Stability is one of the most important prerequisites for increasingly giving the YEM its true purpose: to be an everyday alternative means of payment worldwide, so that large and small companies can feel secure in using the YEM as a means of payment and for the reserves of corporate capital.

The manipulation by e.g. ruinous day trading can be prevented by clear and strict rules.

**Protection of currency holders:** These are private YEM owners, companies and investors. We are representing and protecting the interests of ALL YEM owners.

**Control is necessary** if the set rules by the RCF are accepted and followed by the companies.

**Bringing RC, the YEM, Your Everyday Money, to the public awareness.**

We also connect with governments and finance ministries around the world with the aim of gaining recognition and acceptance, through introduction and education, of how the RC can serve their own interests.

Besides its value for human life, humanitarian work also contributes to growing public awareness of the YEM

## RCF Achievements

*Just to list a few of our main achievements to read out to you and leaving out so many more small, but effective actions to not bore you.*

- Early action was Construction and publication of the rainbowcurrency.org website.
- Communication with the Governments of the 7 regions and with the Banks of several Countries and the IMF.
- Approach to the German Ministry of Finance. Confirmation of acceptance of RC in connection with the EU Court of Justice ruling as a substitute currency was received.
- Applying TWNKLCHAIN from Rainbow Currency as a blockchain solution for the blockchain committee of the Central Bank of Israel - Received confirmation of acceptance.
- Application and acceptance by the Union of International Associations (UIA) as a member and INGO. We successfully registered the RCF in the new 2019 UIA yearbook. This means also recognition by the United Nations.
- We registered many humanitarian, educational and other organizations around the world. They will be beneficiaries of the donations of the RCF charity plans and will get further education how to attract plenty of YEM donations from associates and donors.
- RCF gave a name to the lowest denomination of RC, which is "DAN"
- The Official state-of-the-art RCF exchange for trading of YEM and all YEM related coins is in development with huge progress, and very soon we are awaiting its launch. In this context cooperation with Prior Capital was established for the secure and successful processing of fiat currencies.
- Successful contacts with several investors from different countries to get sufficient financing for all RCF projects.

- RCF was invited by the speakers of the cryptocurrency bill, to be part of the working table that works for the Regulation presented to the Senate of the Republic of Colombia. Our South America Director traveled twice to the city of Bogotá to participate in this important work.
- RCF was invited to participate as an exhibitor in the XXXIII Inter-American Accounting Conference, with the Latin American assistance of public accountants who support the regulation of cryptography. The RCF will represent the Colombian work table and present the progress and conclusions of this work team.
- RCF Colombia is temporarily registered in Blockchain Colombia. When RCF Colombia is legalized in the country, it will become fully part of this entity supported by the Colombian government.
- We represented the RCF at international Blockchain CONGRESSES in different areas.
- The RCF Negotiation a partnership with TRUU in cooperation with an Austrian Academy and Unicorn Network – Truu, a world class, innovative international pure water and pure air supplier.
- On its own, and in cooperation with the same Academy, the RCF supported the successful integration of different points of acceptance for YEM payment, many of them in the field of craft and building trade.
- Additionally there is contact with different Construction Companies in Colombia, interested in offering housing paid with YEM, immediately after the regulation is accepted by Colombian Laws

## **Anticipation**

- RCF is in the process of applying at the United Nations for consultative status.
- Finally the registering of RCF in Liechtenstein, which involves a bigger budget, is around the corner, as well as registration of RCF in all other areas.

- Close networking with more and more international organizations and institutions, NGOs and INGOs.
- We will soon reconnect with all ministries of finance around the world, update them on our exciting new developments, and focus especially on specific countries that are more open to crypto currencies.
- There is the possibility for a smaller country to use RC as official electronic money. If we succeeds, we will have created the pretext for others to follow.
- Continuation of supporting and subscribing more and more additional highly valuable projects.

Examples:

Support of building or otherwise financing a hospital with YEM in Africa.

Support for organic fruit farming in Africa.

Support of educational, humanitarian projects, clean water and energy supplies around the world.

And much, much more to come....

We expect the value of YEM to rise along with the growth of the international market place where it will be used more and more.

I personally believe we cannot even prevent the value of RC and YEM from rising anymore and its going through the ceiling.

We are just at the beginning. So, how I see it is that it would be a good move to purchase YEM for the future use in the expanding YEM economy.

**In the name of the Rainbow Currency Foundation I thank you all very much for listening.**

**And thank you for being here. We can look ahead to a bright and exciting future with the Rainbow Currency, the YEM - Your Everyday Money**
